

InnoSpire Elegance USFAQ's

Technology

Q. What type of compressor does InnoSpire Elegance use?

A. Piston.

Q. Is the InnoSpire Elegance suitable for use by children and adults?

A. Yes.

Q. Which drugs can be nebulized with InnoSpire Elegance?

A. Suitable for nebulizing most drugs that are licensed for aerosol therapy. Typically these are bronchodilators (albuterol), steroids (budesonide) or antibiotics (colistin). Sidestream Plus is usually recommended for antibiotics because a filter can be attached, (filter assembly can be purchased separately).

Q. Is InnoSpire Elegance approved for airline use?

A. No – InnoSpire Elegance is not a fully portable compressor and is therefore is not designed for use outside of the home or hospital, although could be transported in luggage. We produce a range of portable nebulizers – see our website for full details.

Q. What is the operational motor rating for InnoSpire?

A. InnoSpire Elegance is continuously rated. This means that it is suitable for use in either home or clinical environments and can be operated continuously without the need for a cooling period.

Q. What is the compressor life of InnoSpire?

A. Elegance is tested to 1000 hours of use with 5 year warranty.

Treatment

Q. What is the treatment time?

A. Average treatment time for a 2.5ml dose: 6-8 mins*. *Using 2.5ml Salbutamol
