

## TRAVEL LETTER

**Patient's name:** \_\_\_\_\_

**D.O.B.:** \_\_\_\_\_

**Patient's Address:**

\_\_\_\_\_  
\_\_\_\_\_

### Directions:

The person named above has a confirmed diagnosis of OBSTRUCTIVE SLEEP APNEA for which they use a CPAP machine while sleeping which prevents the airway from collapsing which can lead to prolonged periods of apnea and oxygen desaturation. They have in their possession a battery backup power supply to power the CPAP machine.

**CPAP Backup Power Supply Unit:** \_\_\_\_\_

**Serial number:** \_\_\_\_\_

The Pilot-12 and Pilot-24 CPAP Backup Power Supply Units are 98Wh batteries. The watt hour rating is marked on the outer packaging and on the bottom of the unit itself. The lithium-ion battery is CSA approved and is installed inside equipment that has numerous safety fail-safes in the event of damage or short circuit.
