ACCESSING DEVICE SETTINGS

Follow these instructions to access the device settings and prepare the device for patient use.

With the device plugged in, press the POWER button, RAMP button, and ROTARY KNOB at the same time. The display will show “Entering Clinical Menu”. **NOTE** – Device will remain in Clinical Menu for 15 minutes without user interaction before automatically exiting.

**IMPORTANT!** Do not provide these setup instructions to the patient. Only qualified medical professionals should access these device settings.

FEATURES AND SETTINGS

The DV6X series devices have many features and settings to allow patients to personalize and improve their therapy experience. Many are fully adjustable, while others may have limited or no adjustability. The following legend is used throughout this guide:

- **Informational Only** - Indicates a non-adjustable setting.
- **Enabled/Disabled** - Allows you to turn selected options on or off. Patient is able to change these settings.
- **Locked** - Indicates a setting that can be locked by the provider. Locked  ⌈ or unlocked  ⌇ icon will be shown in the upper right side of the Display. Locked settings are only adjustable by the provider. Patient is able to change unlocked settings.
- **Shown/Hidden** - Indicates a feature that can be hidden from the patient by the provider. If a feature is hidden, the patient will not see it in their device.
- **Patient Adjustable** - Indicates a feature that can be adjusted by patient.

**Default** = factory default. Device will return to this setting when “Restore Factory Defaults” option is chosen.

**Initial Setting** = Model specific setting that is not changed during factory default restore.
**MAIN MENU ITEMS**

**To Adjust Settings**
1. Turn Rotary Knob to desired Item and Press.
2. Within item, turn Rotary Knob to desired Option and Press to set.

**To Exit Menus**
1. When done, turn Rotary Knob to “Back” or Exit and Press.

**LANGUAGE SCREEN**

1. Select Language to change the device language.
2. Scroll to desired language and Press to select. Language is set and screen returns to main menu automatically.

**NOTE** - Language is not adjustable by patient.

### Device language options are: All devices have English as initial setting except:

MASK FIT CHECK SCREEN

MASK FIT CHECK is used to test fit a new mask on a patient. SmartFlex settings can also be adjusted from this menu if desired. Ask patient to apply mask and connect tubing to device.

1. Select Mask Fit Check.
   NOTE - Screen not visible to Patient.

2. Turn Rotary Knob to test pressure window and Press. Turn Knob to increase or decrease test pressure setting. Device will provide pressure at the level selected. Leak Flow rate is shown in the bottom right.

3. If desired, turn Rotary Knob to SmartFlex and Press to enter SmartFlex submenu. Refer to CPAP Settings - SmartFlex Settings to set SmartFlex Relief.

QUICK VIEW SCREEN

1. QUICK VIEW screen is informational only and shows an overview of the patient’s therapy.

2. The main screen shows SmartCode Adherence Score™ and Usage Threshold.

3. Options of 1-day, 7-days, 30-days, and 90-days can be reviewed and each shows the Days at 4+ hours, AHI, CAI, Average Daily use, and % Time with Poor Mask Fit for the selected interval.

CPAP SETTINGS SCREEN - MODE

1. Enter CPAP Settings to set up device. Adjust mode to Auto or CPAP as prescribed by doctor.

2. Press to toggle between CPAP and Auto in DV64 series.
**CPAP SETTINGS - PRESSURE SETTINGS**

**CPAP Mode**

1. Choose Pressure to set prescription. Set to CPAP pressure prescribed by doctor, increments of 0.5.

2. Turn knob to Pressure setting and press (set pressure will begin to blink). (Initial Setting = 8) (Default = 10)

3. Turn knob to desired pressure and Press to set.

4. Choose Pressure Unit and Press to toggle between options (cmH2O, hPa, mBar). (Initial Setting = cmH2O) **NOTE - Initial setting is hPa in DV64E-G.**

**Auto Mode**

1. Choose Pressure to set prescription. Set to pressure prescribed by doctor, increments of 0.5.

2. Turn knob to Upper and press (set pressure will being to blink). Adjust then Press to Set. (Default = 15)

3. Turn knob to Lower and press (set pressure will being to blink). Adjust then Press to Set. (Default = 7)

4. Choose Pressure Unit and Press to toggle between options (cmH2O, hPa, mBar). (Initial Setting = cmH2O) **NOTE - Initial setting is hPa in DV64E-G.**

**CPAP SETTINGS - SMARTFLEX SETTINGS**

**CPAP SETTINGS - SMARTFLEX SETTINGS**

1. Select SmartFlex.

2. Turn Knob to adjust Setting for SmartFlex Inhalation and Exhalation Relief from Off or 1 to 3. Press to select desired setting. (Initial Setting = 2) **NOTE - Initial setting is OFF in DV64E-G.**

3. Next choose "Ramp Only" or "Always On" by pressing to toggle to the desired option. (Initial Setting = Ramp Only)

5. Turn to highlight Inhalation, press and scroll to choose rounding setting of 0-5 then Press to select. (Initial Setting = 3)

6. Turn knob to highlight Exhalation and repeat the previous steps. (Initial Setting = 3)

7. Once set, Select “Exit”. **NOTE - Setting adjustable by patient if not locked.**
1. Select Tubing.
   2. Turn knob to select Diameter and Length – **NOTE** - Settings adjustable by patient if not locked. (Initial Setting = 15 mm D, 1.8 m (6') L)
   
<table>
<thead>
<tr>
<th>Diameter</th>
<th>15 mm</th>
<th>22 mm</th>
</tr>
</thead>
<tbody>
<tr>
<td>Length</td>
<td>1.8 m (6')</td>
<td>1.8 m (6'), 2.4 m (8'), 3.0 m (10'), 3.7 m (12')</td>
</tr>
</tbody>
</table>

3. If your patient is using an optional inline bacteria filter, press to select On. (Initial Setting = Off)

4. Choose Pressure.
   3. Time can be set from 0-45 minutes in 5 minute increments. Turn Knob to desired Ramp Time and Press to set. **NOTE** - Ramp Time is adjustable by patient if not locked. (Default = 20 minutes)

5. Turn Knob to desired Ramp Pressure and Press to Set. **NOTE** - Patient cannot adjust pressure. (Default = 4)

**CPAP SETTINGS - **

1. Select Humidity if heated humidification is prescribed.

2. Turn knob until desired humidity setting is reached. (Initial Setting = Off)
   **NOTE** - Initial setting is 2 bars in DV64E-G.

3. If your patient is using an optional inline bacteria filter, press to select On. (Initial Setting = Off)

4. Choose Pressure.

5. Turn Knob to desired Ramp Pressure and Press to Set. **NOTE** - Patient cannot adjust pressure. (Default = 4)
1. Select Brightness.

2. Turn Knob to select Display or Controls.

3. Turn Knob to select Active or Standby.

4. Turn knob to select desired Brightness for either Active or Standby for Display or Controls. **NOTE** - Setting adjustable by patient.

**Initial Setting**
- Display: 16 bars (80%) Active; 4 bars (20%) Standby
- Controls: 16 bars (80%) Active; 0 bars (0%) Standby

**NOTE** – Initial setting for Display, Standby is 0 bars (0%) in DV64E-G.

1. Select Volume

2. Turn knob to set Master Volume. **NOTE** - Setting adjustable by patient. (Initial Setting = 10 bars (50%)).

1. Select Usage.

2. Turn Knob to select Usage Threshold hours of 3 - 9 hours and Press to set. **NOTE** - Screen not visible by patient. (Default = 4)

**NOTE** - The SmartCode feature tracks the number of days that the device was used greater than or equal to “usage threshold” hours.

1. Select Enable.

2. Turn Knob to Enable (✔️) or Disable (no ✔️) Auto-Stop, Auto-Start or Notifications. **NOTE** - If Auto-Stop is Enabled, Auto-Start is automatically enabled. **NOTE** - Settings adjustable by patient unless locked is chosen for auto-stop/start. (Initial Setting = Auto-Stop Disabled (no ✔️); Auto-Start Enabled (✔️); Notifications Enabled (✔️)).

**NOTE** – Initial setting is Disabled (no ✔️) for all items in DV64E-G.
**CPAP SETTINGS - SHOW/HIDE OPTIONS**

Show/Hide allows you to hide certain items from the patient. If hidden, patient will not see them in their device.

1. Select Show/Hide.

   - Usage
   - Enable
   - Show/Hide

2. Turn Knob to Show or Hide Quick View, Clock, Wake-Up Alert, or Notifications.

   **NOTE** - If Clock is hidden, Wake-Up Alert is automatically hidden.

   **NOTE** - Settings adjustable by patient if shown. (Initial Setting = Show)

   **NOTE** - Initial setting is Hide for all items in DV64E-G.

**CPAP SETTINGS - LOCKOUTS OPTIONS**

Lockout allows you to remove patient adjustability from certain items. Lock no adjustability by patient and unlock allows patient to adjust settings.

1. Select Lockouts.

   - Lockouts
   - Algorithm
   - Admin

2. Turn Knob to Lockout Ramp Time, Tubing, Auto-Start/Stop, or SmartFlex.

   **NOTE** - Initial setting is locked for all items in DV64E-G.

**CPAP SETTINGS - ALGORITHM**

1. If algorithm changes are prescribed by doctor, select Algorithm to enter Algorithm adjustment submenus. This menu allows adjustment of:
   - mm:ss for Apnea Duration
   - Hypopnea Percent
   - mm:ss for Hypopnea Duration

2. Turn Knob to select and change Apnea Duration. Press to set value. (Default = 10 seconds)

3. Turn Knob to select and change Hypopnea Percent. Press to set value. (Default = 40%)

4. Turn Knob to select and change Hypopnea Duration. Press to set value. (Default = 10 seconds)
**CPAP SETTINGS - Admin Mode**

1. Select Admin Mode.

2. Turn knob and press to clear usage information or reset factory defaults. Confirm action in pop-up window (yes/no). **NOTE** - Admin Screen not visible to patients.

   Default = factory default. Device will return to this setting when “Restore Factory Defaults” option is chosen.

   Initial Setting = Model specific setting that is not changed during factory default restore.

**CLOCK SETTINGS**

1. Select Clock Settings. **NOTE** - Setting adjustable by patient unless Hide option is chosen.

2. Select Current Time.

3. Set Hour, Minutes, AM/PM.

   **NOTE** – If Standby display brightness of 0% (Off) is chosen, the Clock will not be visible when idle. Wake-Up Alert is available and changes the screen to Active upon activation.

1. Select 12 or 24 hour Format. (Initial Setting = 12)

   **NOTE** – Initial setting is 24 in DV64E-G.

2. Choose On and Set Alert Hour, Minutes, AM/PM. (Initial Setting = 6:00 AM)

3. Set Wake-Up Volume. **NOTE** - Wake-up Alert Volume is separate from Master Volume. [Initial Setting = 10 bars (50%)]

   Default = factory default. Device will return to this setting when “Restore Factory Defaults” option is chosen.

   Initial Setting = Model specific setting that is not changed during factory default restore.
### ADD-ONS - BLUETOOTH

1. Select Add-Ons.
2. Select Bluetooth and press to select On.

### ADD-ONS - OXIMETER

1. Select Oximeter.
2. Oximeter Information Screen.

### ADD-ONS - WIRELESS MODEM

1. Select Wireless Modem.
2. Wireless Modem Information Screen.
